

REMARKS/ARGUMENTS

In order to comply with Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures, 37 C.F.R. §§ 1.821-1.825, Applicants submitted the original sequence listing on July 29, 2004.

In the Raw Sequence Error Report enclosed with the Notice to Comply with Requirements for Patent Applications Containing Nucleotide and/or Amino Acid Sequences mailed July 29, 2005, it was stated that the <220> and associated numeric identifiers and responses are missing for SEQ ID NOS:1-6 of the original sequence listing. Applicant respectfully points out that those numeric identifiers are present in the original sequence listing. The sequences of the instant application represented by SEQ ID NOS:1-6 are random, artificial sequences used to demonstrate the methods of the instant invention. Thus the identification of these sequences as artificial sequences is accurate. Nonetheless, in order to expedite prosecution of the instant application, the sequences have been identified as protein sequence signals in the substitute sequence listing enclosed herewith.

Please find enclosed a substitute sequence listing in the paper and computer readable format to replace the original sequence listing and disk mailed on July 29, 2004. Applicants request entry of this amendment in accordance with 37 § C.F.R. 1.821-1.825.

This amendment is accompanied by a computer disk containing the substitute sequence listing in computer readable form, and a paper copy of the substitute sequence listing that has been prepared from the computer disk. The information contained in the computer disk was prepared using the software program "PatentIn" and is identical to the paper copy. This amendment adds no new matter.

The specification has also been amended to conform the sequences of Table 1 to the substitute sequence listing. This amendment also does not constitute new matter.

Appl. No. 10/788,898
Amdt. dated September 29, 2004
Second Preliminary Amendment

PATENT

If the Examiner believes a telephone conference would expedite prosecution of this application, please telephone the undersigned at 650-326-2400.

Respectfully submitted,

Mark G. Sandbaken, Ph.D.
